

Armature Banding unit NS-RIM

Highest banding quality trough accurate reproducibility of tape tension

Easy and economical operation

Even banding of armatures with polyglass, glass-fibre , reinforced tape or steel wire.

Highly suitable for both production and repair

Equipment can be fit on own lathe-carriage or alternatively on separate rail-base with CNC servodriven movement.

Banding tension	0 - 400 Kg
Band width :	0 - 30 mm
Steel wire diam :	0 - 3,5 mm
Tape supply roll :	0 - 360 mm
Overall dimensions :	500 x 250 x 750 mm (L x W x H)
Machine weight :	150 Kg

Option : **-Unit for infra-red tape heating during the banding.**
(for increase of final tension on armature from 15-20% up to 70-80% of banding tension !)

-Servodriven CNC movement of banding carriage from 0 to 2500mm with set of banding feed , pitch , layers and banding programs.
